Objective

A skilled web developer is proficient in HTML, CSS, JavaScript, React, Tailwind, Bootstrap, Express, and MongoDB. Seeking a dynamic role to leverage my skills and contribute to the development of cutting-edge web applications in a collaborative and growth-focused environment.

Projects

Melody Masters,
Live site || GitHub Client || GitHub Server

It is a Single Page Application that office some courses for learning musical instruments

- ➢ The client site was built with React JS and Tailwind. Also used some npm packages like React-awesome-reveal for animation, Swiper JS for the carousel, and so on.
- ➢ Express JS is used for the server and MongoDB is used for the database. Vercel is used for API hosting.
- ➢ For authentication and hosting I use Firebase.

Toy Marketplace,
Live site || GitHub Client || GitHub Server

It is a Single Page Application that showcases some action figures. Anyone can upload, update and delete products by opening an account. Only login users can upload, update and delete their products.

- ➢ The client site was built with React JS and Tailwind. Also used some npm packages like AOS for animation, Swiper JS for the carousel, React FAST Marquee, and so on.
- ➢ Express JS is used for the server and MongoDB is used for the database. Vercel is used for API hosting.
- ➢ For authentication and hosting I use Firebase.

Chef Recipe Hunter,
Live site || GitHub Client || GitHub Server

Single Page Application that showcases chef recipes. Visitors can view the chef' best recipes.

- ➢ React JS and Tailwind for the client site. Some npm packages like Swiper JS were used in this project.
- ➢ For the server, Express JS is used and the database used MongoDB. Vercel is used for API hosting.
- ➢ For authentication and hosting I use Firebase.
